

"I'm part of ValleyVax because there is a lot of confusion about vaccines and I want people to have a trusted local source of accurate information to help them make healthy decisions."

- Kiko Malin, Public Health Director, Town of Amherst

Brought to you by a group of local public health professionals who want to ensure our community has access to accurate information about vaccines.

“I’ve spent decades training young pediatricians and helping families understand the science and importance of vaccines. Now, more than ever, there is an urgent need for public understanding of just how important vaccines are, and how dangerous vaccine misinformation can be. This is why I’ve joined the ValleyVax team.”

-John Snyder, MD, Amherst Pediatrics

“I am a retired epidemiologist after working for the MDPH for over 30 years. I am passionate about VP Disease Prevention and would like to help my community make the informed decision for their family's health. My famous quote is from Benjamin Franklin: ‘An ounce of prevention is worth a pound of cure.’ ”

- Marija PopStefanija, MPH

"As both a Public Health Director and a nurse in Amherst, I care deeply about my neighbors. Bringing our local health professionals together through Valley Vax is our way of showing our community that we're here to listen, to answer questions, and to help make sense of all the confusing information about vaccines."

- Ann Becker RN, DNP, Associate Professor/Public Health Director
University of Massachusetts Amherst

“As a public health nurse, providing information and access to vaccines for my community is one of my most important roles. The collaboration with many wonderful local providers and colleagues through Valley Vax has allowed us to provide the public with information and to create a space where people can ask questions.”

- Olivia Lara-Cahoon, RN

"I am a family physician in the valley and I care deeply about providing my patients with the highest quality care based in evidence whenever I can. Public health awareness around the safety and efficacy of vaccines is more crucial now than ever, and I am committed to helping our community access accurate information."

- Emily Marsters, MD, Hadley Family Practice
